PROJECTS

Local-E, Advanced Analysis of Online Product Reviews

- With the proliferation of e-commerce, businesses face the challenge of extracting actionable insights from vast, unstructured online product reviews.
- The problem is to develop advanced analytical techniques to accurately decode consumer sentiments, enabling improved customer satisfaction and strategic decision-making.

Virtual Volume Gesture Control

- The website features a user-friendly interface for controlling the volume with two fingers of our hand.
- Implemented Web Camera to capture hand, Media-pipe and Auto-gui to features and navigation.
